

I can't believe that some members of congress are trying to prevent XM Radio from providing XM Instant Traffic & Weather! How Ludicrous. The service is fantastic! Regular radio is absolutely terrible for Traffic & Weather. Regular Radio provides traffic updates every 8 or 15 minutes during rush hour for less the 30 seconds and that includes all the commercials. That is totally poor crappy service.

XM Radio Rocks and is a fantastic service. It is like driving around with 100 channels of cable tv.

Driving in a city that XM Radio provides traffic brings peace of mind because it is live, accurate, up to date and 24 hours around the clock!!!

Radio can't provide that service and wants to stop those that can. Plain and simple.
